EXPERIENCE

Graduate Research Assistant — Chicago, IL
DePaul University — Jan 2026 – Present

- Conduct user research and usability testing to improve student engagement within a campus design studio initiative
- Translate research insights into service design and spatial interaction strategies
- Design communication systems and digital touchpoints to enhance user experience across events and exhibitions

Product Designer Intern — Seoul, KR
NBC Universal — May – Aug 2025

- Designed IP-based product concepts and digital experiences, collaborating with Samsung, Olive Young, and Musinsa
- Developed end-to-end user journey flows for large-scale experiential events (1,500–8,000 attendees)
- Translated market trend research into user-centered product strategies and launch concepts across entertainment IPs
- Supported development of branded digital + physical experience systems including merchandise and event touchpoints

Digital Design Intern — Philadelphia, PA
Philly Fashion Week — Jul – Sep 2023

- Designed audience engagement experiences through on-site digital content and interaction strategies
- Conducted field research including interviews and observations with attendees, designers, and event stakeholders
- Collaborated with production and spatial teams to enhance visitor experience across physical event environments

UX Designer — Gunpo, KR
KTM Technology — Mar 2020 – Dec 2022

- Improved e-commerce conversion rate by redesigning end-to-end purchase flows based on usability research and test
- Conducted user interviews, surveys, and usability testing to identify friction points in product navigation
- Structured information architecture to improve discoverability and search efficiency across technical product systems
- Optimized UI hierarchy and interaction flow for industrial technology web platforms
